EDUCATION

Koç University Full Merit Scholarship(%100) **Sep 2024 – Present**
B.Sc. Computer Science and Engineering | GPA: 3.32 / 4.00 | Istanbul
Double Major: Economics | GPA : 4.00 / 4.00 | Istanbul
Capa Science High School
Weighted GPA: 96.9 / 100 | Istanbul

EXPERIENCE

İnzva Algorithms Program **Oct 2025 – Present**
Data Structures & Algorithms / Competitive Programming

- Solved timed contest problems across DS (heaps, hash maps), graphs (BFS/DFS, shortest paths), dynamic programming, and greedy; practiced complexity-driven implementation

Koç University Investment Group **Feb 2026 – Present**
Member

- Participated in finance and investment-focused events, workshops, and market discussions.
- Followed market trends and developed a stronger understanding of financial analysis and investment strategies.

KU ACM Student Chapter (Koç University Association for Computing Machinery) **May 2025 – Present**
Coordinator(Corporate Relations)

- Contributed to corporate relations activities, including communication with companies and event coordination.
- Helped organize company events and office visits with firms such as Hepsiburada, supporting networking opportunities for students.

Pars Robotics (FRC Team) **Dec 2021 – Jun 2023**
Coding Team Member

- Developed robot software components in Java for FRC 2022/2023 (autonomous routines, control logic, match strategy support).
- Competed at FIRST Robotics World Championship 2023 (Houston) with the software team.

PROJECTS

Teknofest 2025 — Autonomous Vehicle (KUDRET, Koç University Driverless Team) **Nov 2024 – Jun 2025**

- Semi-Finalist. Built perception modules for traffic sign recognition and lane detection in autonomous driving.
- Trained YOLOv8 object detection models; managed labeling and augmentation workflows with Roboflow.
- Worked with 10,000+ images and 50+ classes; contributed to the technical report and on-site representation.

Swiss Chess Tournament Platform | kuchess.com

- Built a full-stack web application to manage Swiss-system chess tournaments.
- Implemented pairing algorithm with tie-break systems (Buchholz, Sonneborn-Berger).
- Designed secure backend with Supabase Auth and Row-Level Security (RLS).
- Deployed production-ready app on Vercel with environment configuration.

DrFlower Clinic Website | drflower.net

- Designed and structured a bilingual medical/aesthetic clinic website.
- Developed service taxonomy, UI/UX layout, and responsive design.
- Integrated dynamic content workflows using Supabase and no-code tools.

Food Chain Through Time — Java Swing Simulation Game

- Implemented a turn-based grid simulation across Past/Present/Future eras using Java Swing.
- Applied OOP (inheritance, polymorphism, encapsulation); added AI agents, data-driven asset loading, and save/load persistence.

SKILLS & INTERESTS

Technologies	React, Supabase, Vercel, Git, Github
Programming	Java, Python, C
Core Skills	Data Structures & Algorithms, Graph Algorithms, Dynamic Programming, Competitive Programming
Languages	Turkish (Native), English (B2)
Interests	Table Tennis, Chess
